The origin of ROBO INU FINANCE

Autonomous robot "dogs" will be used to explore underground caves on Mars (Credit: NASA/JPL)

As scientists, we were so inspired by NASA's initiative that
"Robotic Dogs May Soon Be Heading to Mars",
that we decided to create a token named ROBO INU.
Part of this supply will be donated to NASA's vision.
We believe in the future created by NASA.

The article can be accessed [here](#). It was written on the 8th of February, 2021.

— What is Robo Inu Finance about?

In recent years, the fast growth of blockchain innovation and technology has become a catalyst for the development of fintech built on blockchain.

To promote transparency, the role of brokers in the financial industry is slowly being replaced. The way that financial flow is being carried out in the blockchain allows users to pay, receive, withdraw or transfer money from one place to another without going through a broker. As a result, the need for fintech and blockchain innovation has been growing tremendously. The requirement to own, buy or exchange different currencies in large amounts is just another key reason to drive this remarkable growth.

Another key reason is attributed to the ever-changing human mind, behavior and culture. However, these can also be obstacles within the blockchain industry. Along with the development of blockchain technology, is the advancement of machine learning and artificial intelligence (AI), which can help people reduce working hours and save money. Ultimately, people can eventually have more time for their families.

Upon seeing such development and growth, ROBO INU FINANCE was born with the vision to build an open ecosystem for everyone regardless of their age or background to gain financial freedom. We aim to create a financial tool for individuals to better manage their own finances and for companies to leverage on AI to enhance people's lives in the fintech industry.

With many years of research and experience in the fintech/payment gateway industry, we want to focus and build a new ground-breaking platform which will facilitate affordable, smooth and ethical financial transactions globally with high security – anytime and anywhere.

— The future of crypto payment & blockchain technology

It is often believed that blockchain innovation will be the future of the global financial system. Digital assets are definitely the future of global payment forms. Blockchain technology does not only revolutionize the payment gateway, but will also modernize it by creating a new payment method. This innovative payment method consists of combining the existing system with digital assets built on blockchain while unlocking a new world with faster, more secure and more decentralized systems.

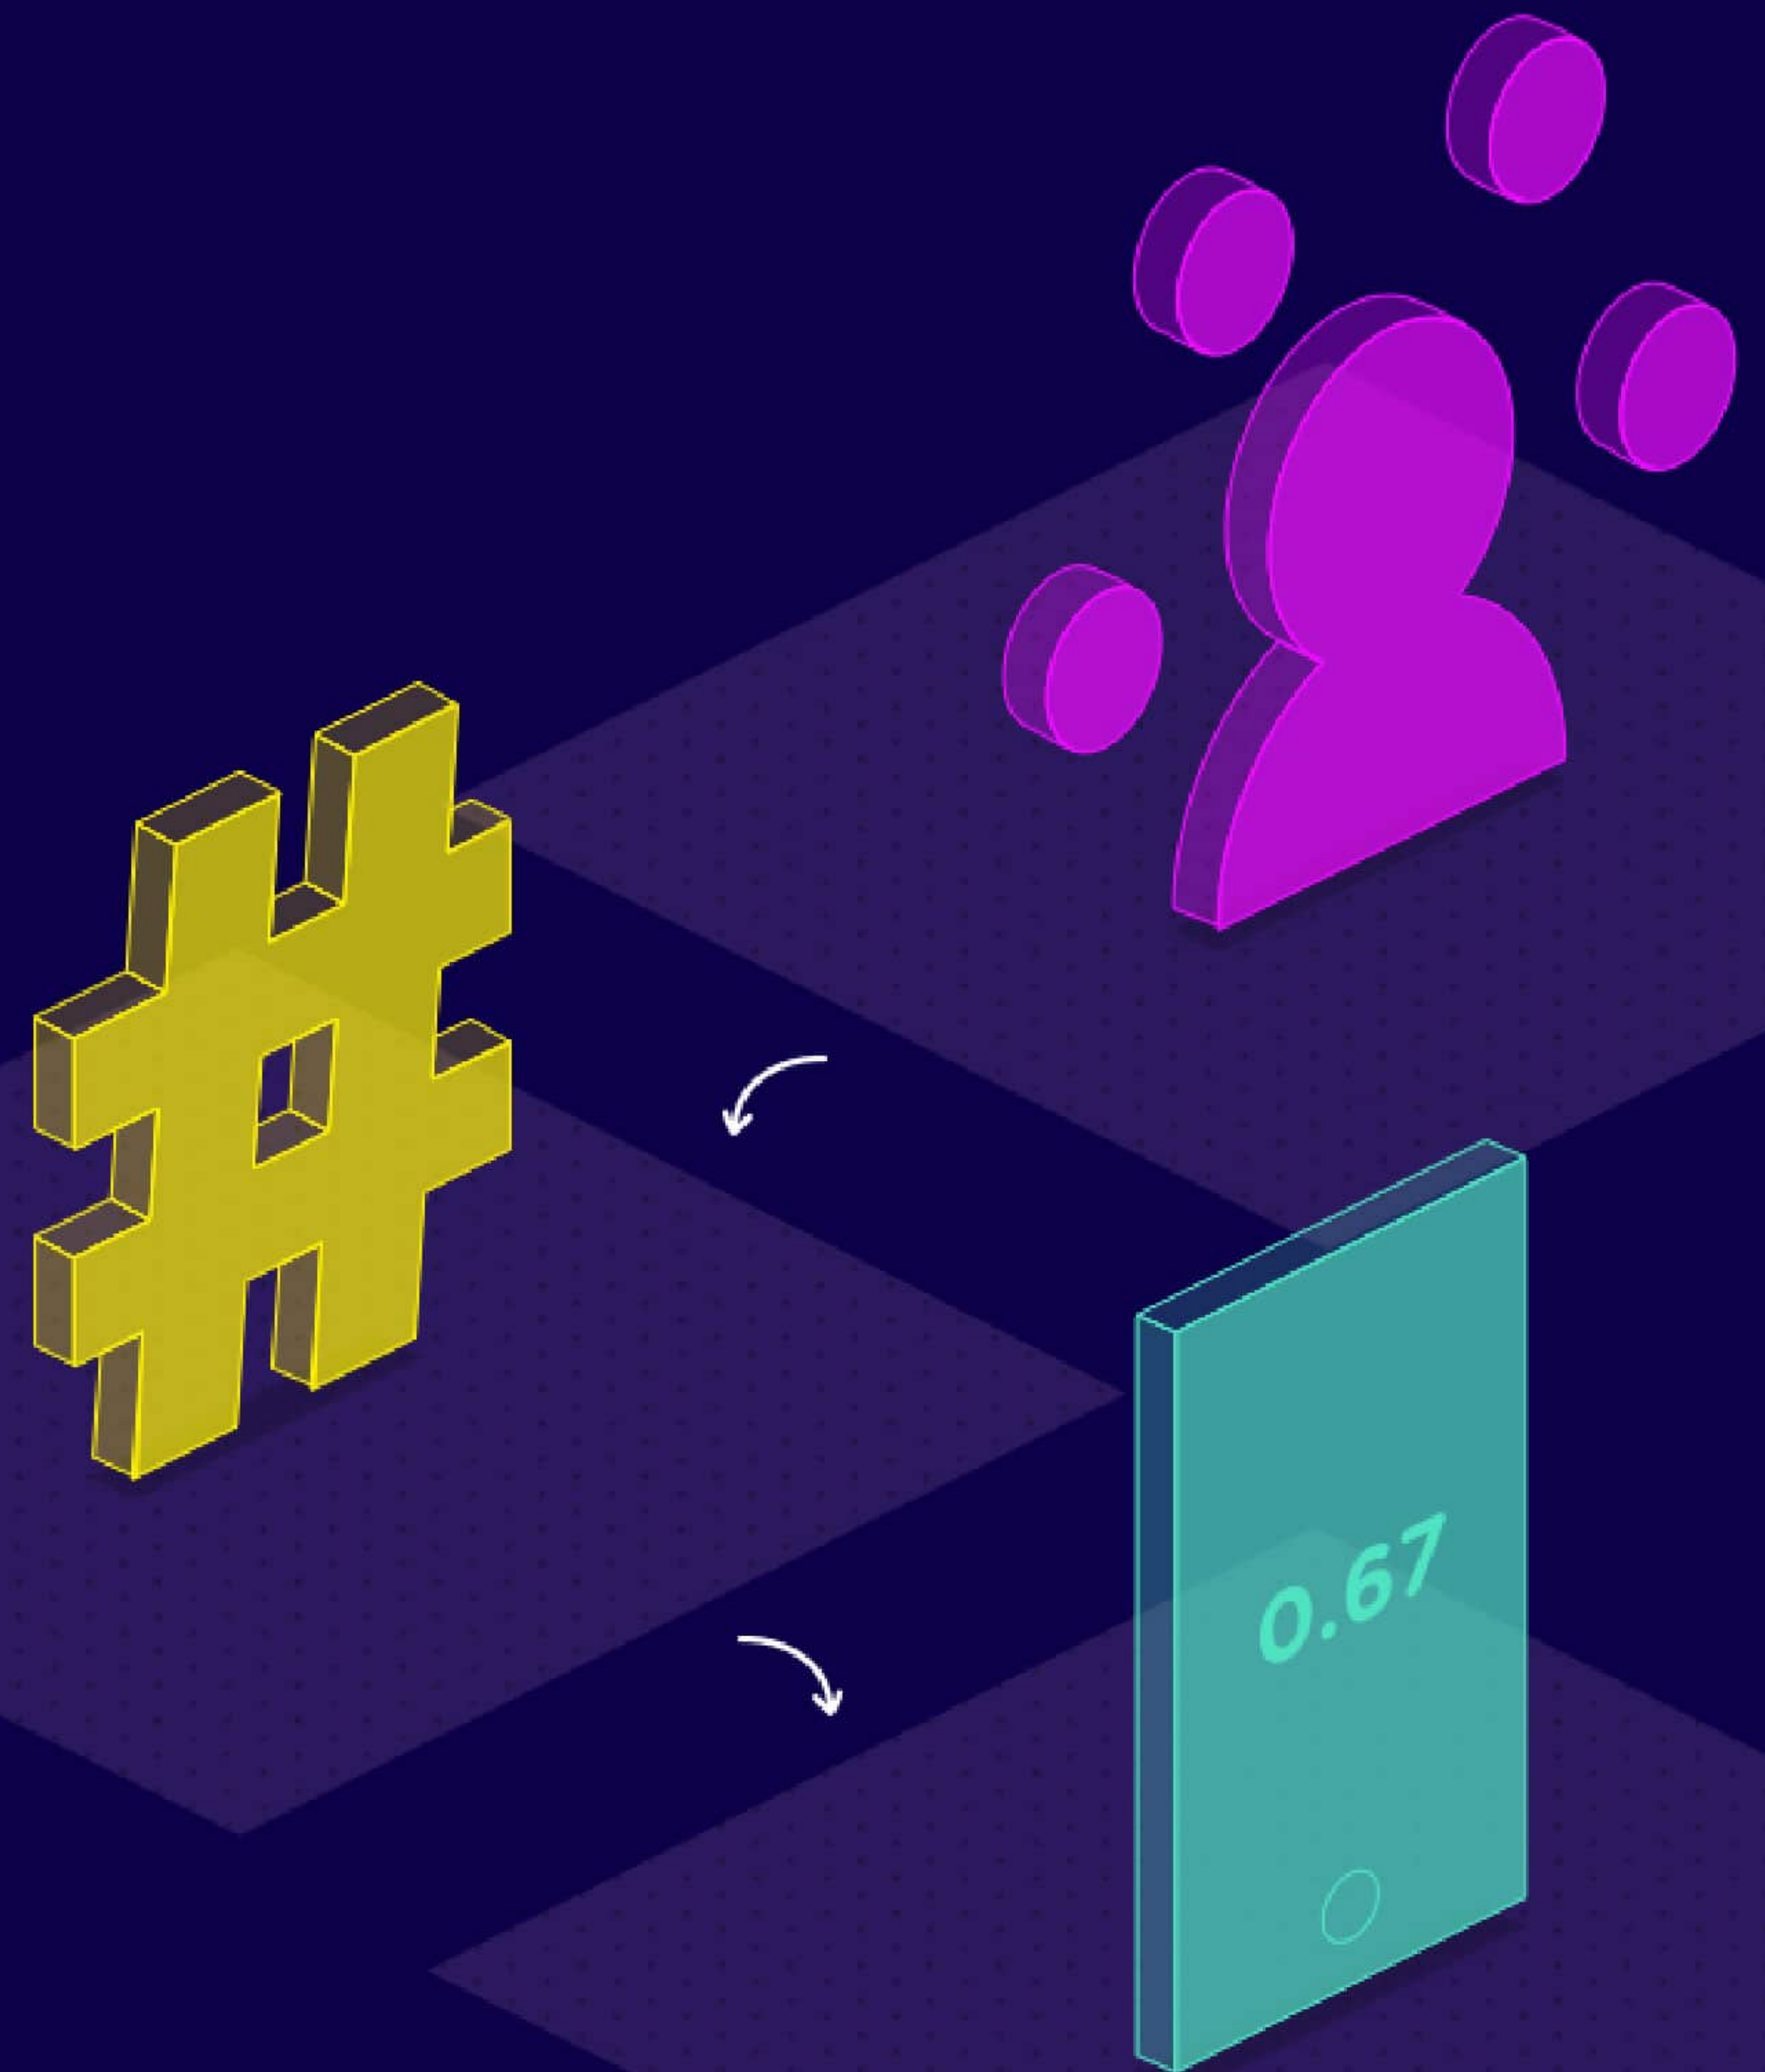

The exponential increase in cryptocurrency usage over the past few years has shattered the traditional payment gateway by making the transactions of sending and receiving money as easy as sending and receiving an email.

— Challenges within the payment gateway industry which the world of cryptocurrency is facing

While a broker or a third party who facilitates fund transactions will soon be replaced, more and more cryptocurrency with the trend of trying to replace the broker in between the fund transaction built on blockchain will adopt a decentralized approach with simple, yet more advanced technology.

This leads to more risks involved and an increase in fraud, especially in a large volume of individual transactions.

You can purchase a digital asset quickly but you might not be able to get a refund without a broker or third party to guarantee the transaction.

— Solutions that ROBO INU Finance is trying to build

Blockchain technology and innovation is gradually replacing the broker or the third party but it does not mean that we will eliminate them entirely. Robo Inu Finance will build a platform to ensure fairness as well as reliability between the digital asset transactions amongst individuals through an integrated smart contract. This platform will also be able to facilitate the transfer of cross-border funds so that individuals can leverage on blockchain innovation to convert cryptocurrency into cash and transfer money to their loved ones who reside in different countries and continents.

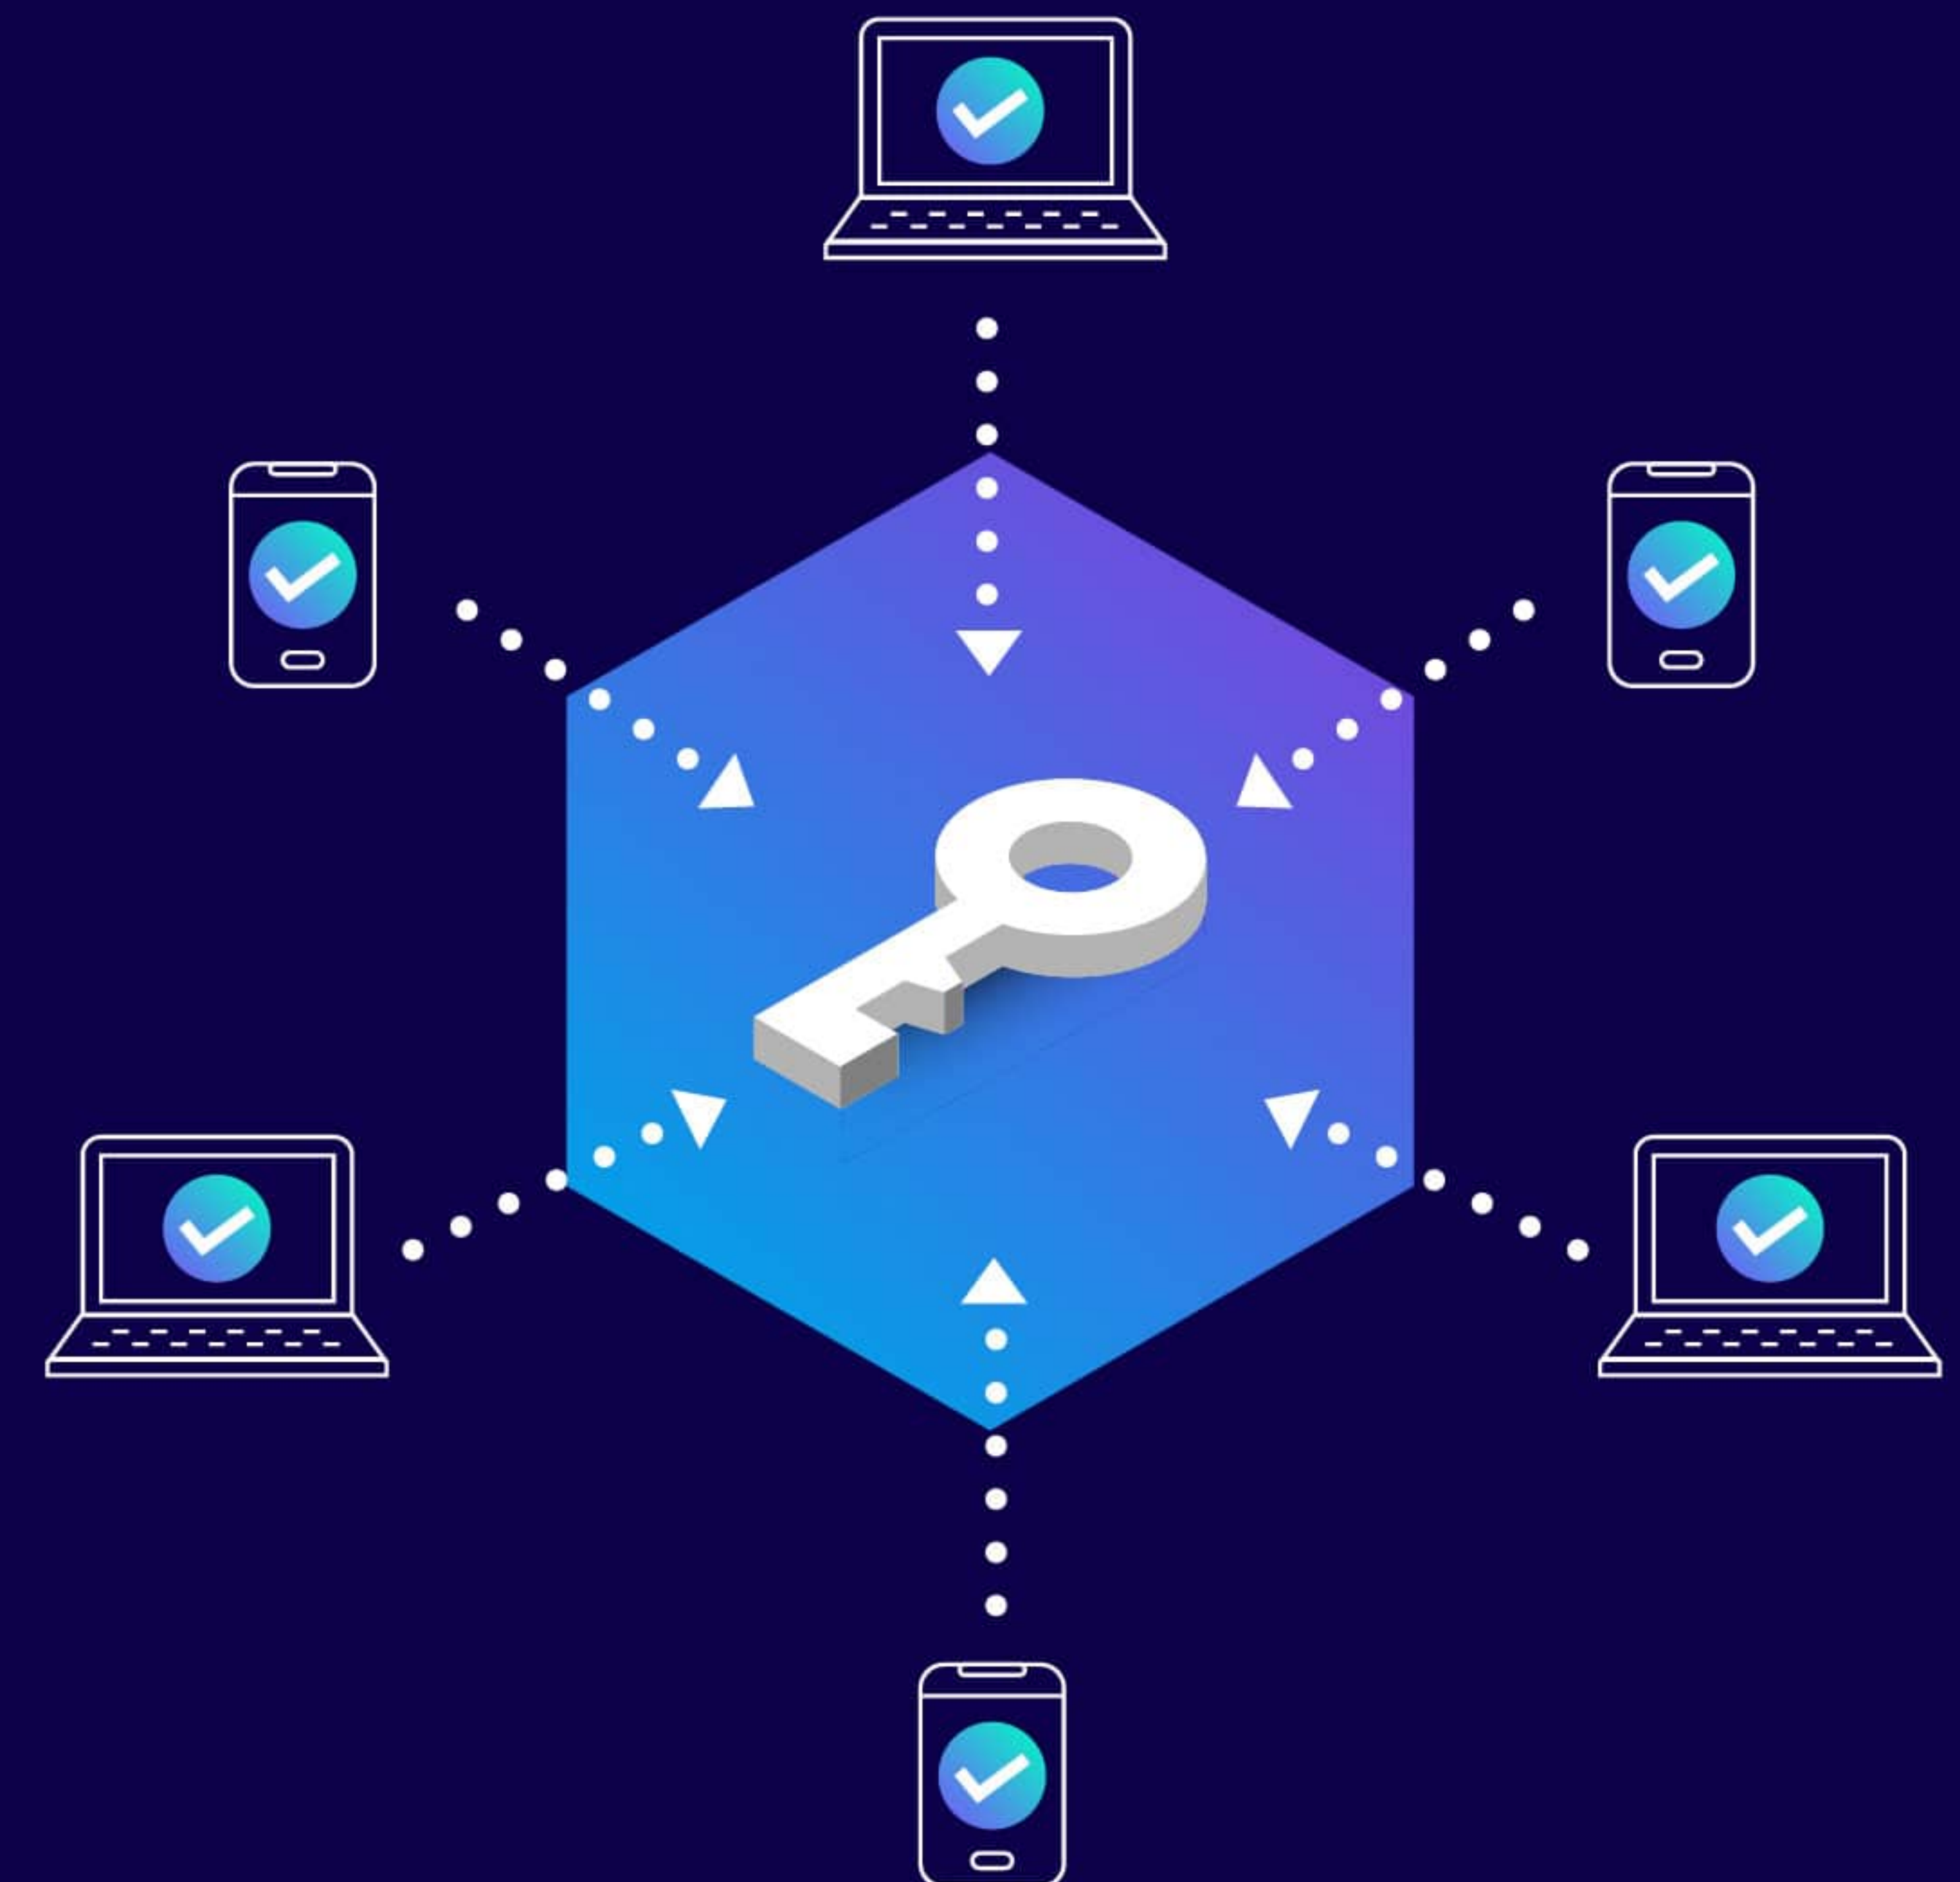

Buyers and Sellers will work together using smart contracts built on Robo Inu Finance's platform where fraud in the cryptocurrency world or payment gateway will be eliminated.

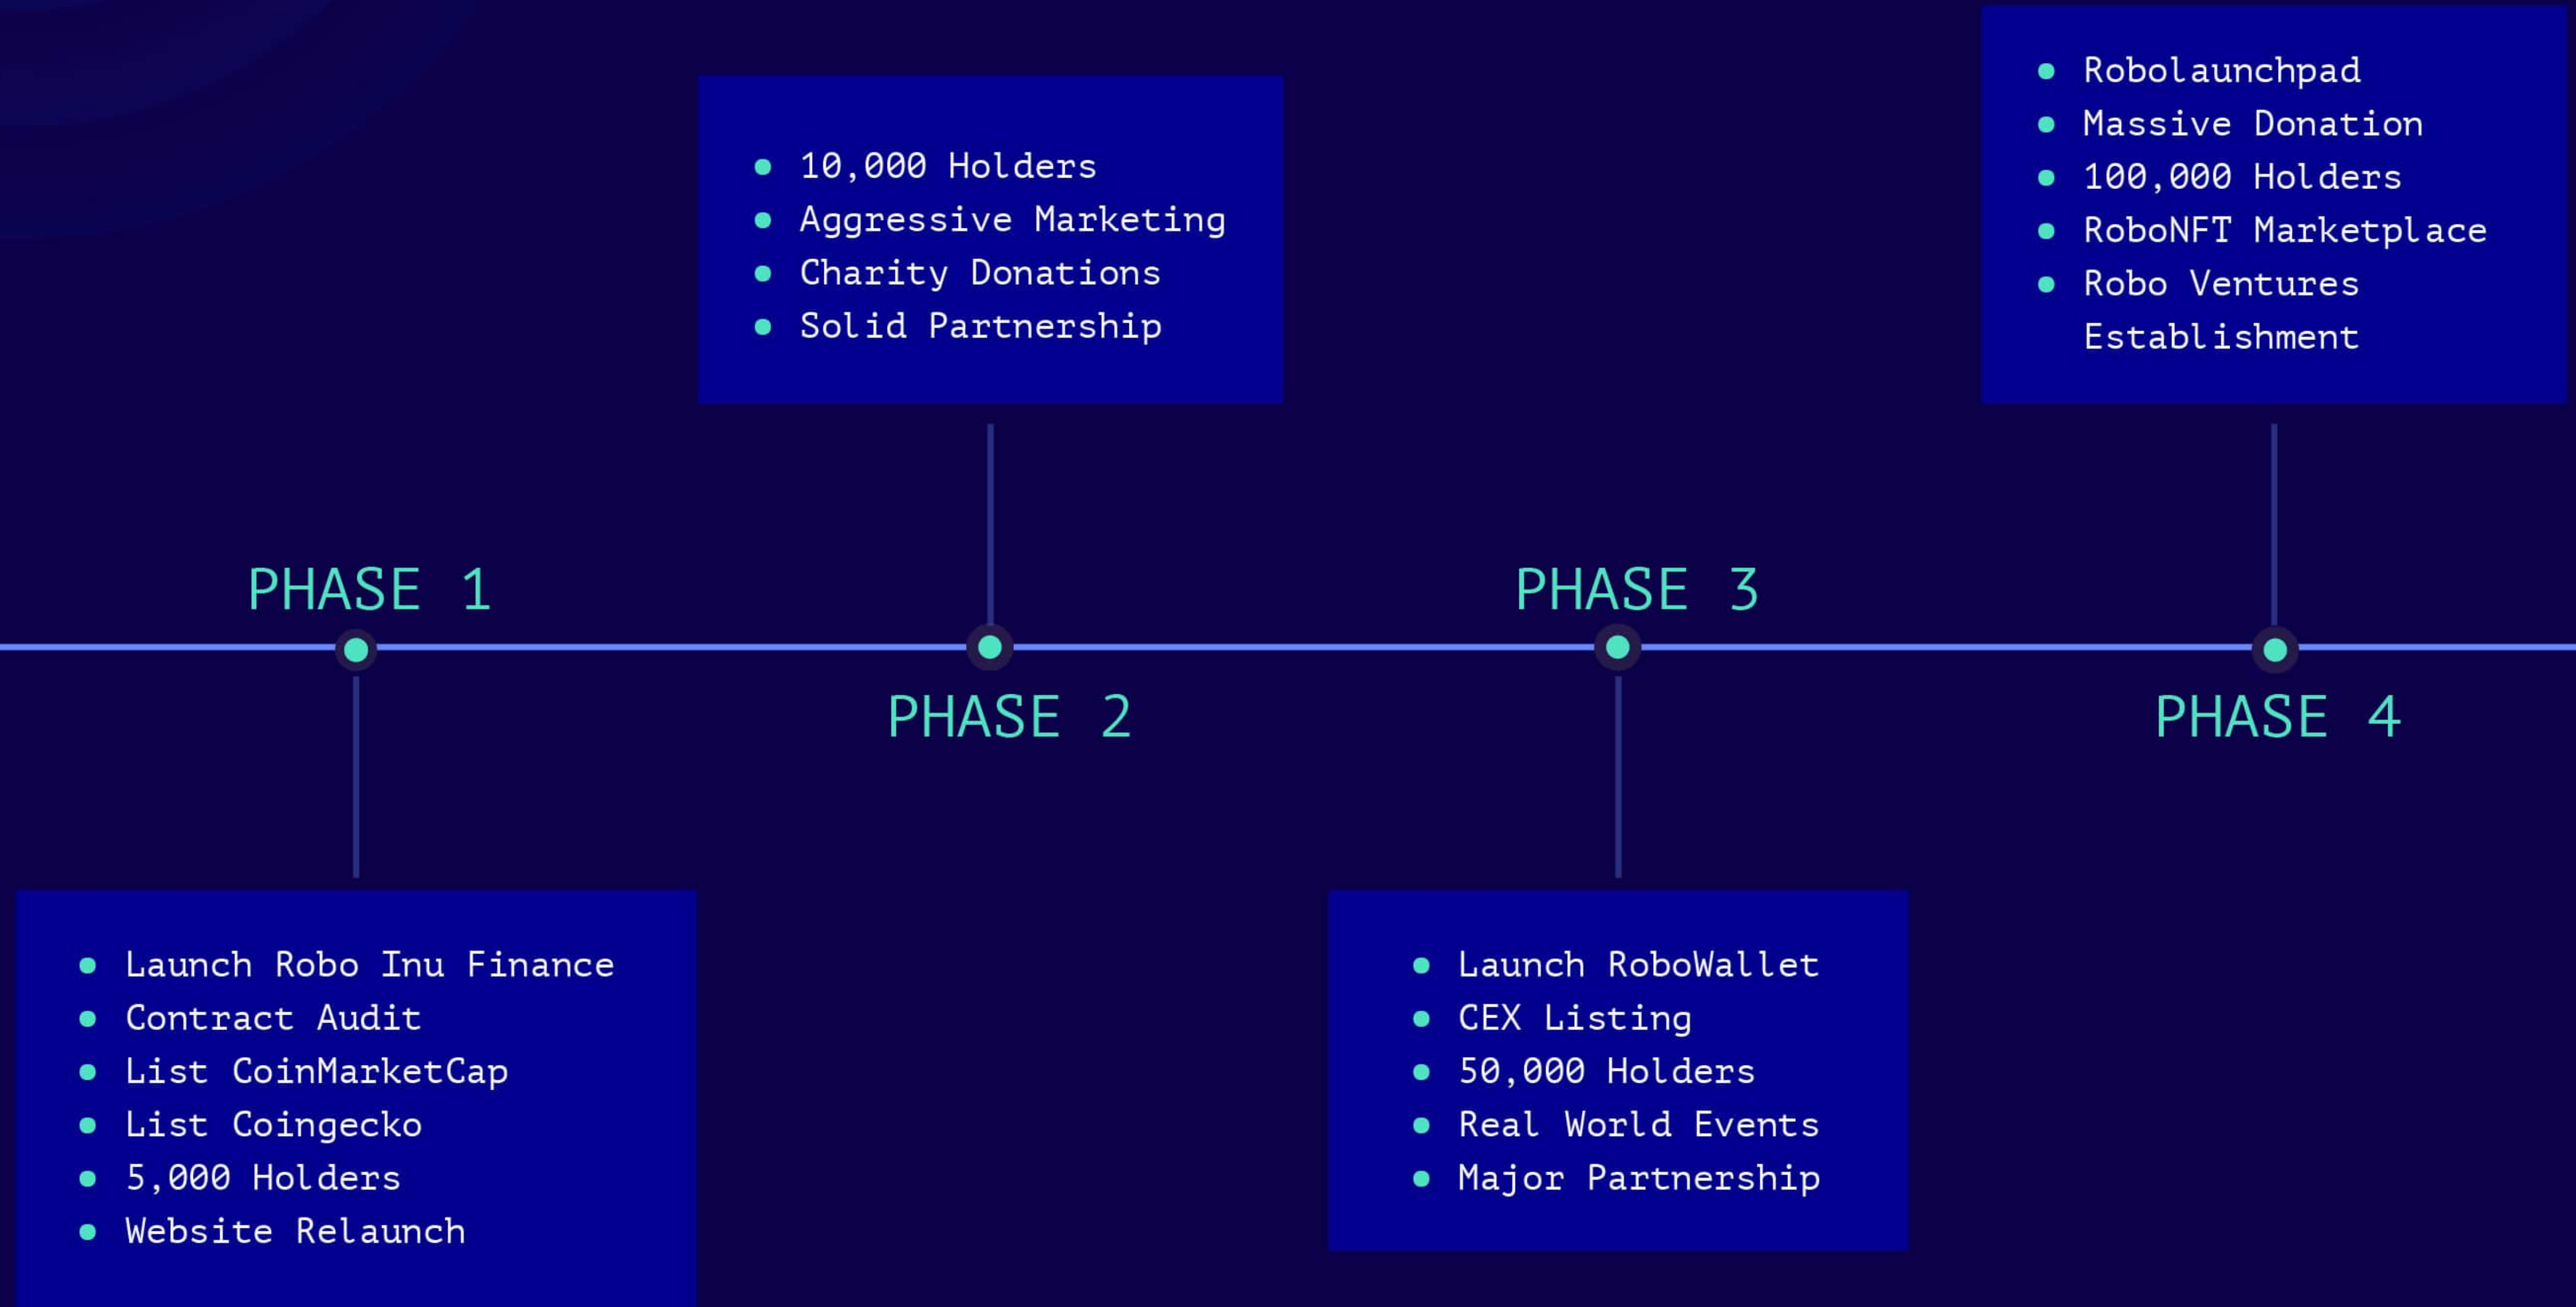

— OUR ECOSYSTEM

1. RoboWallet- a personal wallet which has the ability to store all currencies, \$RBIF tokens and other cryptocurrencies as well.
 - The wallet also has the ability to bridge different cross-chain networks with the lowest transaction fee.
 - The wallet also has the ability to manage/track cryptocurrency/ fiat expenses. It aims to break through the digital assets in daily transactions to meet with the strong development needs in today's cryptocurrency world (such as digital asset payment, digital asset mortgage, cross-border fund transfer or product staking).

2. Robolaunchpad – an incubator for potential projects with real user cases. All these projects are checked and moderated by the Robo Inu Finance Team comprised of ex-google developers and individuals with more than 10 years of experience in the world of cryptocurrency, payment gateways and startups. There is a guarantee that no scam projects will be released on the Robolaunchpad.
3. RoboNFT Marketplace – a high-valued digital asset exchange which has daily auctions (NFT products) integrated with RoboWallet where you can own any digital asset value with just a click of a mouse. RoboWallet will be built with the ability to hold the collectibles.

— ROADMAP

— Tokenomics

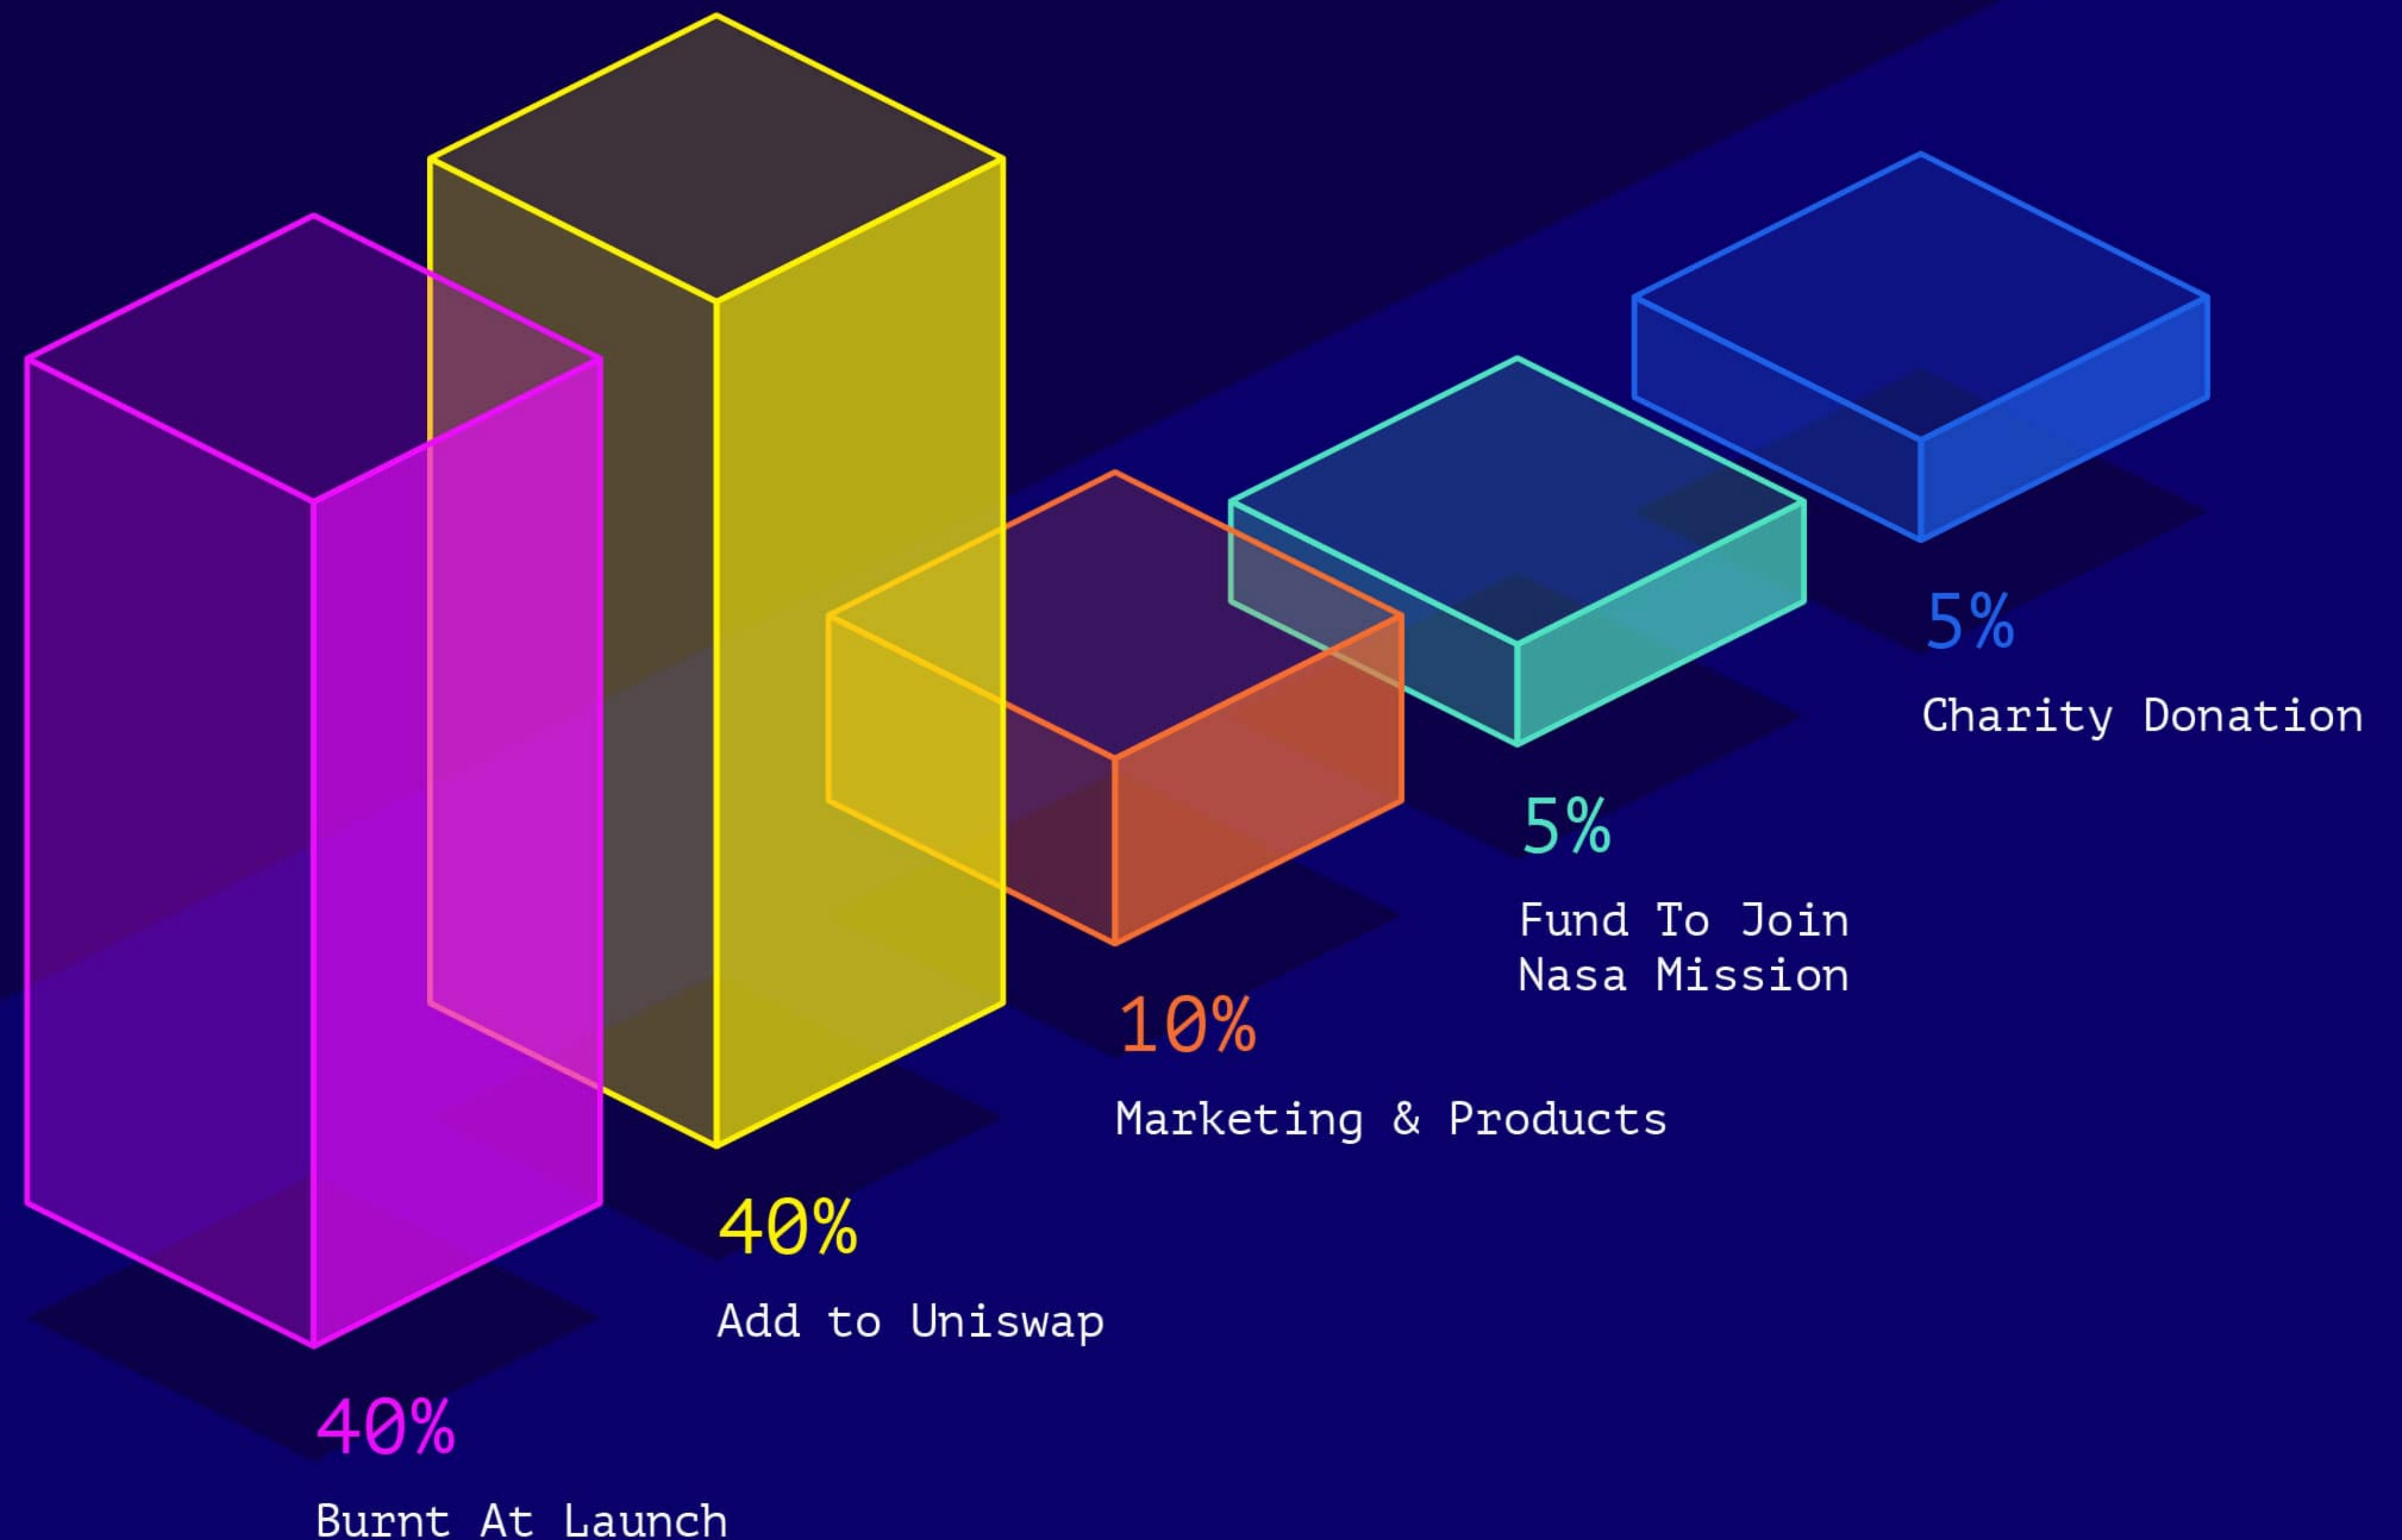

\$RBIF is the official token for Robo Inu Finance. It is an ERC-20 token. The total supply is **100,000,000,000,000,000** tokens. Every sell and buy transaction of \$RBIF has a tax percentage which is used to fuel the growth of Robo Inu Finance's ecosystem.

Buying Tax : 4%

1% Reward Holders.
3% Marketing Wallet

Selling Tax : 10%

3% Reward Holders.
7% Marketing Wallet

— Robo Ventures Establishment

To ensure the community's interests are well taken care of, ROBO VENTURES will be established and incorporated when we hit 50,000 holders. The purpose of ROBO Ventures is to help holders earn money by holding **\$RBIF** tokens. Robo Ventures strives to invest into SpaceX and TSLA so that holders can earn a portion of profits by holding the token even if a bear market hits us.

A detailed plan will be announced when we hit the milestone of 50,000 holders.
