The origin of ROBO INU FINANCE

Autonomous robot "dogs" will be used to explore underground caves on Mars (Credit: NASA/JPL)

As being scientists, we are inspired by NASA's initiative

"Robotic Dogs May Soon Be Heading to Mars",

we decided to create a token named ROBO INU.

Part of supply will then be donated to NASA's vision.

We believe in the future created by NASA

The article can be accessed here. It was written on 8th Feb 2021.

— What is Robo Inu Finance about?

In recent years, the fast growth of blockchain innovation and technology has become a catalyst for the development of fintech built on blockchain

To promote transparency, the role of brokers in the financial industry is slowly being replaced. The way how financial flow is being carried out in the blockchain allows users to pay, to receive, to withdraw or to transfer money from one place to another without going through a broker. As such, the need for the fintech and blockchain innovation has been tremendously growing. The requirement to own, to buy or to exchange in different currencies with a big amount are the another key reason to drive this growth

Another key reason is due to human minds and behaviors. However, these are also obstacles in the blockchain industry. Along with the development of blockchain technology is the advancement of machine learning and artificial intelligence (AI), which helps people reduce the working hour and save money. Thus, people can eventually have more time for their family and children.

Upon seeing such developments and growth, ROBO INU FINANCE was born with the dream to build an open ecosystem for everyone regardless of your age or your races to gain financial freedom. We aim to create a financial tool for individuals to better manage their own finances and for companies to leverage on AI to enhance people's life in the fintech industry.

With many years of research and working experience in the fintech/payment gateway industry, we want to focus and build a new ground-breaking platform which will facilitate the smooth and seamless fund transaction within the country or cross borders more affordable with high security anytime and anywhere

The future of crypto payment & blockchain technology

It is believed that blockchain innovation will be the future of global financial system. Digital assets are definitely the future of global payment forms. Blockchain technology does not only revolutionize the payment gateway but also will modernize it by creating a new payment method, which consists of combining the existing system with digital assets built on blockchain, unlocking a new world with faster, more secure and more decentralized systems.

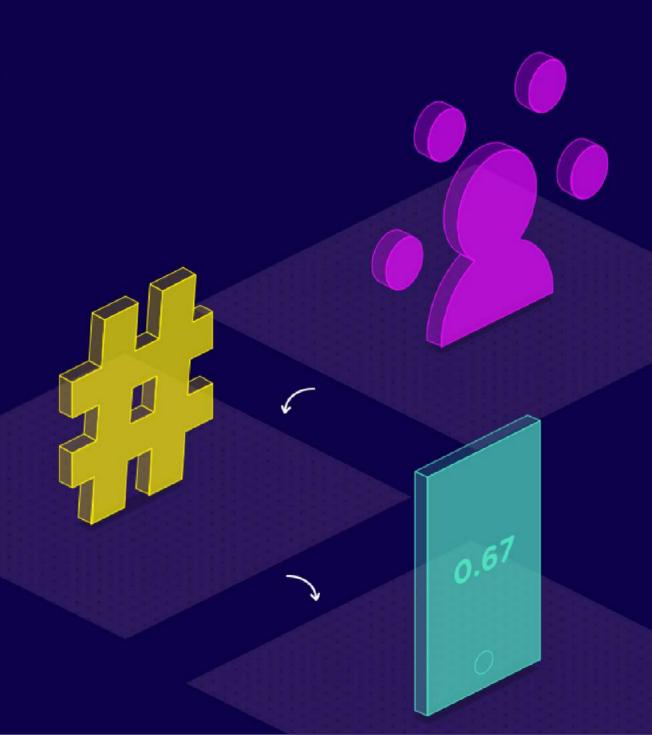

The exponential increase in cryptocurrency usage over the last few years is explained by a compelling reason which broke the traditional payment gateway by making the transactions of sending and receiving money as easy as sending and receiving an email.

Challenges within the payment gateway industry which the world of cryptocurrency is facing

While a broker or a third party who facilitates fund transaction is soon going to be replaced, more and more cryptocurrency with the trend of trying to replace the broker in between the fund transaction built on blockchain, more and more cryptocurrency tokens are adopting a more decentralized approach with simple but more advanced technology. This leads to more risks involved especially in a large volume of individual transaction as well as an increase in fraud in those transactions.

You can purchase a digital asset quickly but you might not be able to get a refund without a broker or a third party to guarantee the transaction.

Solutions that ROBO INU Finance is trying to build

Blockchain technology and innovation is gradually replacing the broker or the third party but it does not mean that we will eliminate them, Robo Inu Finance will build a platform to ensure fairness as well as reliability between digital asset transaction between individuals through an integrated smart contract. This platform will also be able to facilitate the transfer of funds cross-border so that individuals can leverage on blockchain innovation to convert cryptocurrency into cash and transfer to their loved ones who reside in different countries or continents.

Buyers and Sellers will work together on smart contracts built on Robo Inu Finance's platform, in which fraud in the cryptocurrency world or payment gateway will be eliminated.

— OUR ECOSYSTEM

- 1. RoboWallet- a personal wallet which has the ability to store all the currencies, \$RBIF token as well as other cryptocurrencies.
 - The wallet also has the ability to bridge different cross-chain networks with the lowest transaction fee.
 - The wallet also has the ability to manage/track cryptocurrency/ fiat expenses. It aims to break through the digital assets in daily transactions to meet with the strong development needs in today's cryptocurrency world (such as digital asset payment, digital asset mortgage, cross-border fund transfer or product staking).
- 2. Robolaunchpad, an incubator for potential projects with real user cases. All these projects are checked and moderated by Robo Inu Finance Team comprises with people as ex-google developers and people with more than 10 years of experience in the world of cryptocurrency, payment gateways as well as startups. There will be a guarantee that no scam projects will be released on Robolaunchpad.
- 3 RoboNFT Marketplace- a high-valued digital asset exchange which has daily auctions (NFT products) integrated with RoboWallet where you can own any digital asset value with just a click of a mouse and RoboWallet will be built to be able to hold the collectibles.

- ROADMAP • Robolaunchpad Massive Donation • 10,000 Holders • 100,000 Holders • Aggressive Marketing • RoboNFT Marketplace • Charity Donations Robo Ventures • Solid Partnership Establishment PHASE 1 PHASE 3 PHASE 2 PHASE 4 • Launch Robo Inu Finance • Launch RoboWallet • CEX Listing • Contract Audit • 50,000 Holders • List CoinMarketCap • Real World Events • List Coingecko • 5,000 Holders • Major Partnership • Website Relaunch

— Tokenomics

\$RBIF is the official token for Robo Inu Finance. It is an ERC-20 token. The total supply is **100,000,000,000,000** tokens. Every sell and buy transaction of \$RBIF has a tax percentage which is used to fuel the growth of Robo Inu Finance's ecosystem.

Buying Tax : 4%

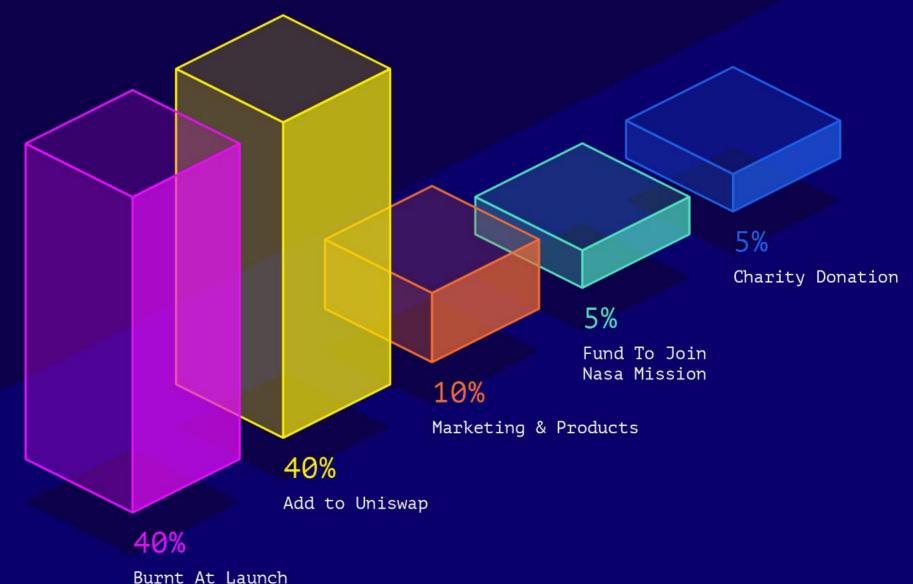

1% Reward Holders.

3% Marketing Wallet

Selling Tax: 10%

3% Reward Holders.

7% Marketing Wallet

— Robo Ventures Establishment

To ensure the community's interests well taken care of, ROBO VENTURES will be established and incorporated when we hit 50,000 holders. The purpose of ROBO Ventures is to help holders earn money by holding **\$RBIF** token. Robo Ventures ambitions to invest into Spacex and TSLA so that holders can earn a portion of profits by holding the token even when bear market hits us.

Details plan will be announced when we hit the milestone of 50,000 holders
